D-xylylitol (sweetener), sucrose, natural flavor, mangosteen, horsetail extract, turmeric root extract, maca root, DL-malic acid (hydroxysuccinic acid), L-ascorbic acid (vitamin C), natural salt, steviol glycoside (sweetener), aloin (leaf), green tea (leaf), nicotinamide, d-alpha-tocopheryl acetate (vitamin E), calcium d-pantothenate, pyridoxine hydrochloride (vitamin B6), riboflavin (vitamin B2), thiamine hydrochloride (vitamin B1), sodium selenate, folic acid, beta carotene (colorant), biotin, cholecalciferol (vitamin D3), cyanocobalamine (vitamin B12)

KEY INGREDIENTS:

Plant-sourced silica

12 essential vitamins (including vitamins A, C and E)

Plant derived mineral blend

Whole-fruit Mangosteen

Organic glyconutrient-rich aloe vera

Organic decaffeinated green tea

Maca

Curcumin

Why is organic decaffeinated green tea important?

Green tea is well studied and documented for its traditional use. Organic decaffeinated green tea is added because it possesses numerous beneficial compounds. We elect to use a decaffeinated source to keep our consumers' best interest in mind since caffeine consumption may not be appropriate for everyone.

Why were the sweeteners chosen for Bod•ē Strong?

The inclusion of premium ingredients, formula efficacy and flavor in the Bod•ē Pro products are our highest priorities. After extensive research and testing during the product development phase, we chose to combine organic cane sugar with xylitol and stevia because they are naturally-derived sweeteners — not artificial ones — and are compatible with the overall formula and flavor of Bod•ē Strong. This sweetener blend helps keep the calories, sugar and carbohydrates lower.

THE SCIENCE OF MINERALS:

Your physical well-being is affected by the minerals you take into your body. Minerals help support various physiological functions.

- The body cannot survive without nature's fundamental minerals, yet it cannot manufacture minerals. They must be obtained from the diet or through supplementation.
- Modern-day diets may lack the appropriate balance of minerals due to mineral-depleted soils and over-processed foods.

FREQUENTLY ASKED QUESTIONS:

Why supplement with Bod•ē Strong?

The answer is simple — Bod•ē Strong is one complete, premium formula that provides your body the nutrients it needs for performance.

Why are major, trace and ultra-trace, plant-sourced minerals used?

Because plant derived minerals come from Mother Nature herself! Here's how it works: Plants assimilate minerals from the soil they are embedded in, and in the process, they become highly nutritious for humans to eat. Minerals can be found in nearly all foods that are grown in soil. Our minerals are not man-made, but are carefully extracted from plant vegetation to help replenish the full spectrum of minerals, at levels that nature intended.

Which minerals are included in the natural salts found in Bod•ē Strong?

Because we source our minerals from naturally occurring plant vegetation, the level of individual minerals may vary slightly from batch to batch.
